

CURRICULUM VITAE: Ward B. Manchester IV

Associate Research Professor

Department of Atmospheric, Oceanic and Space Sciences

The University of Michigan

Address

Office 2436C, Space Research Building
2455 Hayward Drive
Ann Arbor, MI 48109-2143
USA

Phone: (734)-647-3475
Fax: (734)-615-9723
chipm@umich.edu

Education

- Ph.D. Astronomy, University of Illinois, Urbana-Champaign, May 2000
Thesis: The Equilibria, Stability and Nonlinear Dynamics of Magnetically-Sheared Atmospheres with Applications to the Solar Environment
Supervisors: Prof. Dimitri Mihalas & Dr. Boon Chye Low
- B.S. in Physics & Astronomy, University of Illinois, Urbana-Champaign, 1990

Employment

- *Associate Research Professor*, University of Michigan, 2010–present.
- *Associate Research Scientist*, University of Michigan, 2007–2010.
- *Assistant Research Scientist*, University of Michigan, 2001–2007.
- *Postdoc*, University of Michigan, 2000–2001.
- *Newkirk Graduate Research Assistant*, High Altitude Observatory, Boulder, Colorado 1996–2000.
- *Research Assistant*, University of Illinois, Urbana-Champaign, 1994–1996.
- *Teaching Assistant*, University of Illinois, Urbana-Champaign, 1992–1994.

Publications

- Author or co-author of 51 papers in international refereed journals.
- 10 papers in conference proceedings of international conferences.
- 119 presentations at conferences and workshops,
- including 56 invited talks with 26 first author invited talks.
- Together 1443 times cited (ISI Web of Science)
h-index: 21
ResearcherID: I-9422-2012

Awards & Recognitions

- 2010 Research Faculty Recognition Award, University of Michigan

Adviser to PhD Students

- Meng Jin (University of Michigan) Thesis Defense: Spring 2014
- Fang Fang (University of Michigan) Thesis Defense: April 20, 2012
- Noé Lugaz (University of Michigan) Thesis Defense: November 10, 2006

Membership in Scientific Societies

- American Astronomical Society
- American Geophysical Union.
- American Physical Society.

Research Activity Highlights

My research interests concern solar magnetism and magnetic flux transport from the convection zone into the corona, and through the heliosphere. In this context, I have contributed to basic theory and modeling efforts with analytical work and large-scale numerical simulations. The topics that I am particularly interested in are: magnetic flux emergence, magnetohydrodynamic instabilities, coronal mass ejection (CME) initiation, propagation, and CME-driven shocks. Flux emergence was the topic of my Ph.D. thesis research, which demonstrated that the expansion of magnetic fields in a gravitationally stratified atmosphere naturally produces Lorentz forces that drive shear flows. These flows lead to the formation of highly energized coronal magnetic fields, which are observed to be at the epicenter of coronal eruptions. This work provides a fundamental explanation for shear flows, which for decades, have been prescribed as ad hoc boundary conditions in numerical models of CMEs, flares and filament eruptions. While at the University of Michigan, I have advanced this fundamental theory of CME initiation by simulating the eruption of both magnetic arcades and flux ropes by such self-induced shear flows. I have also simulated the propagation of CMEs from solar corona to Earth and Saturn, and in doing so discovered new aspects of CME interaction with the interplanetary medium including complex CME-driven shock structures.

Publications

Seminars and Colloquia

1. Global MHD Simulations of Flux Rope Driven CMEs, Colloquium presented at High Altitude Observatory, Boulder, CO, April 17, 2002
2. 3D Simulations of Magnetically Driven Coronal Mass Ejections, Colloquium presented at University of Michigan, Ann Arbor, MI, June 07, 2002
3. Flux Rope Propagation from the Solar Convection Zone to the Earth, Colloquium presented at High Altitude Observatory, Boulder, CO, March 04, 2004
4. Flux Rope Emergence from the Solar Convection Zone, Colloquium presented at Lockheed-Martin, Palo Alto, CA, October 25, 2004
5. The Source of Magnetic Shear that Drives Solar Eruptions, Colloquium presented at JPL, Pasadena, CA, June 24, 2005
6. CME-driven Shock Structure and Reverse Shock Formation Resulting from Interaction with a Bimodal Solar Wind, Science Talk presented at High Altitude Observatory, Boulder, CO, August 17, 2005
7. Adaptive Solution of the Magnetohydrodynamic Equations with Finite Volume Upwind Schemes, Colloquium presented at Scientific Computing Division, Boulder, CO, August 25, 2005
8. The Source of Magnetic Shear that Drives Coronal Eruptions, Seminar presented at the University of Michigan, Ann Arbor, MI, December 19, 2005
9. The Source of Magnetic Shear that Drives Flares and Coronal Mass Ejections, Colloquium presented at Laboratory for Atmospheric and Space Physics, Boulder, CO, March 15, 2006
10. Simulations of the Sun-Earth System, Science Talk presented at High Altitude Observatory, Boulder, CO, March 17, 2006
11. The Source of Magnetic Shear that Drives Flares and Coronal Mass Ejections Colloquium presented at the Naval Research Laboratory, Washington D.C., April 18, 2006
12. The Source of Magnetic Shear that Drives Flares and Coronal Mass Ejections Colloquium presented at George Mason University, Fairfax, VA, April 19, 2006
13. A Source of Magnetic Shear and a Mechanism for Flares and Coronal Mass Ejections Science Talk presented at the High Altitude Observatory, Boulder, CO, July 7, 2006
14. The Source of Magnetic Shear that Drives Flares and Coronal Mass Ejections Seminar presented at the Center of Integrated Plasma Studies, Boulder, CO, July 7, 2006
15. Shear Flows Driven by the Lorentz Force During Flux Emergence: The Energy Source for Coronal Mass Ejections and Flares, Seminar presented at Michigan State University, East Lansing, MI, October 4, 2006

16. Shear Flows Driven by the Lorentz Force During Flux Emergence: The Energy Source for Coronal Mass Ejections and Flares, Seminar given at Massachusetts Institute of Technology, Cambridge, MA, October 13, 2006
17. The Source of Magnetic Shear that Drives Flares and Coronal Mass Ejections, Seminar presented at Center for Astrophysics, Harvard University, Cambridge, MA, October 16, 2006
18. Shear Flows Driven by the Lorentz Force During Flux Emergence: The Energy Source for Coronal Mass Ejections and Flares, Seminar presented at New Jersey Institute of Technology, March 27, 2007
19. Simulations of Stellar Magnetic Eruptions and their Interaction with Stellar Winds, Seminar presented at the University of Chicago, March 30, 2007
20. Shear Flows Driven by the Lorentz Force During Flux Emergence: The Energy Source for Coronal Mass Ejections and Flares, Seminar presented at Chinese Academy of Sciences, May 23, 2007
21. Simulating the Propagation of Coronal Mass Ejections from The Sun to The Earth Seminar presented at the University of Michigan, September 19, 2007
22. Shear Flows Driven by the Lorentz Force: An Initiation Mechanism for Coronal Mass Ejections and Flares Seminar presented at the University of Alabama Huntsville, April 4, 2008
23. Signatures of Emerging Magnetic Flux Ropes: Shear Flows and Electric Current, Seminar presented at LMATC Solar and Astrophysics Lab, May 7, 2008

Grants and Subcontracts Awarded as PI

Title: Evolution of CME Shocks in a Realistic Lower Corona

Sponsor: NASA through subcontracts from JPL and George Mason University

Period: 03/11/05-08/31/07

Amount: \$109,000

Title: Tomographic Determination of Lower Boundary Conditions in the Corona

Sponsor: NSF through a subcontract from the University of Illinois

Period: 01/01/06-12/31/08

Amount: \$87,000

Title: 3D MHD Numerical Simulations of Magnetic Flux Emergence with Comparisons to TRACE and MDI observations

Sponsor: NASA SR&T Program

Period: 02/15/2006-02/14/2009

Amount: \$292,661

Title: Modeling the 3D Density Structure and White-Light Appearance of CME Events

Sponsor: NASA LWS TR&T Program

Period: 08/01/06-07/31/09

Amount: \$260,000

Title: Modeling Magnetic Flux Emergence
Sponsor: NASA/SDO through subcontract by Lockheed
Period: 01/01/2010-12/31/2010
Amount: \$20,000

Title: Simulating CME-Driven Shocks and SEP Acceleration
Sponsor: NASA LWS TR&T Program
Period: 07/01/2009-06/30/2013
Amount: \$420,000

Title: Modeling CME Initiation with Magnetic Flux Emergence
Sponsor: NSF/Space Weather Program
Period: 10/01/2010 - 08/31/2013
Amount: \$360,000

Title: Remote Diagnosis of the Solar Wind: Interpreting Solar Wind
Sponsor: NASA through subcontract from UCLA
Period: 01/01/2010-12/31/2012
Amount: \$33,000

Title: Interaction of ICMEs with Mars Atmosphere and Ionosphere
Sponsor: NASA through subcontract from University of Colorado
Period: 03/01/2011-02/28/2014
Amount: \$112,000

Title: Exploring CME Initiation with Charge State Composition
Sponsor: NASA SR&T Solar & Heliospheric Physics
Period: 01/01/2013-02/28/2016
Amount: \$246,000

Title: Integrated Global-Sun Model of Magnetic Flux Emergence and Transport
Sponsor: NASA & NSF Strategic Capability Program subcontract from NASA Ames Period:
01/01/2013-12/31/2017
Amount: \$505,000
