CLIMATE/SPACE/EARTh 321:
Earth Systems Dynamics
Tuesday, Thursday 12:00 to 1:20pm
Location – In Person: CSRB 2246
Instructor: Dr. Claire Pettersen
Email: pettersc@umich.edu
Office: CSRB 2543A
Class Website on Canvas:
https://umich.instructure.com/courses/660594
Class Website on Piazza:
https://piazza.com/umich/winter2024/climate321001wn2024/home

Instructor office hours:
Synchronous: In Conference Room (CSRB 2525)
Mondays 3:00 to 4:00pm (Dr. Pettersen)
Tuesdays 1:30 to 2:30pm (IA: Nick Dewhirst)
Thursdays 3:30 to 5:00pm (IA: Nick Dewhirst)
Asynchronous: Piazza, Monday - Friday

Course Information
Catalog description: Introduction to theory of fluid motions for atmosphere and ocean. Elementary kinematics, fundamental forces, effects of earth's gravity and rotation, concepts and applications of hydrostatic and geostrophic balance.
Credits: 3
Prerequisites: MATH 115, MATH 116
Advisory Prerequisites: CLIM / SPACE 320, MATH 215, MATH 216 (simultaneous)
Please consult with the Instructor if these prerequisites are not met

COURSE LEARNING OUTCOMES
Upon successful completion of this course, students will be able to:
• Apply basic vector mathematics and understand how it is applied to geophysical fluid flows
• Derive and physically interpret the equations of motion
• Recognize and describe the fundamental principles associated with the dynamics of geophysical fluid flows
• Apply multiple coordinate systems and understand their usefulness
Utilize diagnostic tools to diagnose, describe, and interpret the fundamental dynamical processes at work in large-scale circulations

**Course Details**

**Instructional Modality:** In person, synchronous

**Meeting time:** T TH 12:00pm – 1:20pm Eastern Time Zone

**Location:** CSRB 2246

**Canvas Course URL:** [https://umich.instructure.com/courses/660594](https://umich.instructure.com/courses/660594)

**Required Textbooks/Chapters:**
- Title: Mid-Latitude Atmospheric Dynamics: A First Course
  - *Chapters 1, 2, 3, and 4*
  - Author: Jonathan E. Martin
  - ISBN: 978-0-470-86465-4

- Title: An Introduction to Dynamic Meteorology
  - *Chapters 1, 2, and 3*
  - Authors: James R. Holton and Gregory J. Hakim
  - ISBN: 978-0-12-384866-6

**Recommended Textbooks/Chapters:**
- Title: Atmosphere, Ocean, and Climate Dynamics
  - Authors: John Marshall and R. Alan Plumb
  - ISBN: 978-0-12-558691-7

- Title: Atmospheric Science an Introductory Survey, 2nd Edition
  - *Chapters 7 and 8*
  - Authors: John M. Wallace and Peter V. Hobbs
  - ISBN: 0127329501

(Books and chapters are provided on Canvas under **Library Tools**)

**Class Discussion:** This term we will be additionally be using Piazza for online class discussion (please see Participation Expectations below). The system is highly catered to getting you help fast and efficiently from classmates and myself. Rather than emailing questions to the teaching staff, you should post your homework or topic questions on Piazza. I will be active on Piazza Monday through Friday, but only student feedback should be expected on weekends. If you have any problems or feedback for the developers, email [team@piazza.com](mailto:team@piazza.com).

If you are not yet signed up, please sign up here:
[https://piazza.com/umich/winter2024/climate321001wn2024](https://piazza.com/umich/winter2024/climate321001wn2024)
# Tentative Schedule

This schedule is approximate and will possibly change during the semester. Updates will be reflected on Canvas.

**GRADING**

Exams 1, 2, 3 (12% each) 36%
Homeworks 50%
Class Participation 14%

The following grading scale will be used:

- **A**: [93.3 – 100]
- **A-**: [90.0 – 93.3)
- **B+**: [86.7 - 90.0)
- **B**: [83.3 - 86.7)
- **B-**: [80.0 - 83.3)
- **C+**: [76.7 - 80.0)
- **C**: [73.3 - 76.7)
- **C-**: [70.0 - 73.3)
- **D**: [60.0 - 70.0)
- **F**: <60

**Weekly Time Management**
Exams (36%)
• All exams will be done in class. No working together.
• Exams 1, 2, and 3 will not be cumulative – they will only encompass the topics reviewed between exams. This includes Exam 3, which will be given during the Final Exam time.

Homework (50%)
• Homework is assigned to Canvas on Wednesdays and due the following Thursdays at 10pm (+1 week).
• Questions on the homework may be on concepts presented during the same week it is due or from prior classes.
• Graded homework will be returned the following Tuesday before class.
• Homework should be submitted via Canvas (see notes on Canvas on how to submit and scan)
• Late Homework Policy: Homework received after the due date and time will incur a 25% reduction and homework turned in more than 72 hours after the due date will not be accepted (all grading will be done over the following weekends).
• Please contact me (email or Canvas) if you require additional time due to unforeseen circumstances.

Participation (14%)
Lecture:
You are expected to attend lecture in person and be alert and engaged. However, if you miss class due to circumstances beyond your control, lecture recordings and the presentations will be posted on the Canvas page. Please let me know if you are expecting a long absence from live lectures.

There will be periodic (weekly to every other week) in-person assigned participation exercises and quizzes. These are designed to reinforce key topics from the lectures and readings. These topics often show up on the exams. All in-person / in-class participation will be announced either in lecture or on Canvas with an assignment (due the day of the exercise) prior to the in-class exercise.

You are also encouraged to ask questions during lecture. If you have a question after lecture, please use Piazza and post your question there. I encourage you to ask any and all relevant questions – it is cliché, but there really are no bad questions when it comes to dynamics!
**Piazza Forum:**  
The purpose of the course Piazza is for students to help each other get through difficult homework problems and understand course concepts. *You are expected to participate in the assigned class discussions on Piazza.* Some weeks there will be a posted participation or discussion question or topic to be answered/addressed on Piazza. These exercises are meant to help you become familiar with topics in class through the application of online tools and resources. Additionally, these Piazza posts can and will lead to further discussion on topics of particular interest in class.

---

**University of Michigan Policies**

**DIVERSITY & INCLUSION STATEMENT**  
Diversity is a source of strength, creativity, and innovation. Our dedication to engineering for the public good is inseparable from our commitment to diversity, equity and inclusion (DEI). We lead with an equity-centered engineering mindset in how we teach, do research and support each other.

The Michigan Engineering community includes people from different races and ethnicities, gender identities, sexual orientations, ages and socio-economic backgrounds. We speak different languages, come from different cultures and countries and practice different religions. We have different abilities and disabilities, different political perspectives and life experiences. We all belong here. (Source: https://www.engin.umich.edu/culture/diversity-equity-inclusion/)

**QUARANTINE OR ISOLATION DUE TO COVID-19**  
As they have throughout the past year and a half, policies around academic and public health are subject to change as this pandemic evolves. This course will follow all policies issued by the University, which are documented on the Campus Blueprint’s FAQ (https://campusblueprint.umich.edu/faqs/). These policies may change over the course of the term, so please review the Campus Blueprint’s FAQ for the most up to date information.

**ACADEMIC CALENDAR & RELIGIOUS OBSERVANCES**

- See: https://ro.umich.edu/sites/default/files/calendar/pdfs/Cal_2023-2024.pdf

**HONOR CODE**  
The Honor Code outlines certain standards of ethical conduct for persons associated with the College of Engineering at the University of Michigan. The policies of the Honor Code apply to graduate and undergraduate students, faculty members, and administrators. The Honor Code is based on these tenets:

- Engineers must possess personal integrity both as students and as professionals. They must be honorable people to ensure safety, health, fairness, and the proper use of available resources in their undertakings.
- Students in the College of Engineering community are honorable and trustworthy persons.
- The students, faculty members, and administrators of the College of Engineering trust each other to uphold the principles of the Honor Code. They are jointly responsible for precautions against violations of its policies.
- It is dishonorable for students to receive credit for work that is not the result of their own efforts.

SEXUAL AND GENDER-BASED HARASSMENT POLICY
As an instructor, one of my responsibilities is to help create a safe learning environment on our campus. As such, I am dedicated to providing a harassment-free experience for everyone, regardless of gender, gender identity and expression, age, sexual orientation, disability, physical appearance, body size, race, ethnicity, religion (or lack thereof), or technology choices. Sexual and/or gender-based harassment will not be tolerated in any form, including in class discussions, group work (homework and/or projects), or on social media or other online media.

INDIVIDUAL WITH REPORTING OBLIGATIONS
It is my goal that you feel able to share information related to your life experiences in classroom discussions, in your written work, and in our one-on-one meetings. I will seek to keep information that you share with me private to the greatest extent possible. However, due to my role within the University, I am considered an "Individual with Reporting Obligations (IRO)". This means that I am required to share information regarding sexual misconduct or information about a crime that may have occurred on U-M's campus with the University. The University will use this information to inform you of your rights and access to services.

Students may speak to someone confidentially by contacting the Sexual Assault and Prevention Awareness Center's (SAPAC) Crisis Line at (734) 936-3333, or using any of the other confidential resources provided on the following website: https://sexualmisconduct.umich.edu/student-resources/

ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES
It is the policy of the University of Michigan to maintain an academic and work environment free of discrimination and harassment for all students, faculty, and staff. The University’s commitment to diversity and inclusiveness extends to students with disabilities. The University is committed to the academic success, personal development and general well-being of all students.

COURSE EVALUATIONS
Students will be provided with an opportunity to anonymously evaluate this course and your learning experience. Student participation is an integral component of this course, and your feedback is important to me. I strongly encourage you to participate in the course evaluation.

RECORDING OF CLASS LECTURES
Course lectures may be recorded and made available to other students in this course. As part of your participation in this course, you may be recorded. If you do not wish to be recorded, please contact me during the first week of class to discuss alternative arrangements.
